One integrated solution to serve all your wireless needs and stay connected to your EHR

PointClickCare & Aerohive

Uninterrupted access to EHR platforms, such as PointClickCare has become critical to the operational success of thousands of senior care organizations. Loss of access to the software can have serious implications. In order to optimize EHR, it is critical for skilled nursing facilities, assisted living homes, and CCRC communities to have a secure, reliable Wi-Fi network infrastructure in place to provide secure, anytime, anywhere access to the application.

With the PointClickCare and Aerohive partnership, healthcare organizations will be able to:

- Receive priority bandwidth for PointClickCare's EHR platform on your wireless network, ensuring optimal application experience
- Access PointClickCare anytime and anywhere through mobile devices – computer carts, laptops, tablets, and even smartphones
- Easily deploy pre-configured devices through Aerohive's cloud-based Mobility Suite

How does your organization benefit from our partnership?

Priority Bandwidth

optimizing the wifi-connection so your staff has secure, uninterrupted access to the PointClickCare EHR platform. Anywhere. Anytime!

Time Savings

reduce spending time spent managing the wireless network with Aerohive's cloud-enabled HiveManager management platform. Healthcare administrators can easily deploy the solution without requiring extensive wireless expertise or advanced networking skills.

Ensure Compliance

meet HIPAA compliance requirements with an integrated security and policy framework. Aerohive incorporates fast, secure roaming and identity-based access control, which is enforced on all access points, routers and switches. Healthcare IT teams can use these advanced security and authentication features to support their compliance initiatives.
